

Allergy Policy

1. Aims

This policy aims to:

- Set out our school's approach to allergy management, including reducing the risk of exposure and the procedures in place in case of allergic reaction.
- Make clear how our school supports students with allergies to ensure their wellbeing and inclusion.
- Promote and maintain allergy awareness among the school community.

2. Legislation and guidance

This policy is based on the Department for Education (DfE)'s guidance on allergies in schools and supporting students with medical conditions at school, the Department of Health and Social Care's guidance on using emergency adrenaline auto-injectors in schools, and the following legislation:

The Food Information Regulations 2014

The Food Information (Amendment) (England) Regulations 2019

3. Roles and responsibilities

We take a whole-school approach to allergy awareness.

3.1 Allergy Lead

The nominated allergy lead is Mrs O Neill (Assistant Principal & SENDCO).

They are responsible for:

- Promoting and maintaining allergy awareness across our school community.

- Recording and collating allergy and special dietary information for all relevant students. The information will be collated by Student Services.

Ensuring:

- All allergy information is up to date and readily available to relevant members of staff.
- All students with allergies have an allergy action plan completed by a medical professional.
- All staff receive an appropriate level of allergy training.
- All staff are aware of the school's policy and procedures regarding allergies.
- Relevant staff are aware of what activities need an allergy risk assessment.
-
- Regularly reviewing and updating the allergy policy.

3. 2 First Aid Officer

The First Aid Officer is responsible for:

- Co-ordinating the paperwork and information from families including allergy action plans completed by a medical professional.
- Co-ordinating medication with families.
- Keeping stock of the school's adrenaline auto-injectors (AAIs).
- Checking spare AAIs are in date.
- Providing the canteen with photos of students with allergies, The photos will list allergy information relating to the student. Any other appropriate tasks delegated by the allergy lead.

3.3 Teaching and Support Staff

All teaching and support staff are responsible for:

- Promoting and maintaining allergy awareness among students.
- Maintaining awareness of our allergy policy and procedures.
- Being able to recognise the signs of severe allergic reactions and anaphylaxis.
- Attending appropriate allergy training as required.
- Being aware of specific students with allergies in their care.
- Carefully considering the use of food or other potential allergens in lesson and activity planning.
- Ensuring the wellbeing and inclusion of students with allergies.

3.4 Parents/Carers

Parents/carers are responsible for:

- Being aware of our school's allergy policy.
- Providing the school with up-to-date details of their child's medical needs, dietary requirements, and any history of allergies, reactions and anaphylaxis.

- If required, providing their child with 2 in-date adrenaline auto-injectors and any other medication, including inhalers, antihistamine etc., and making sure these are replaced in a timely manner.
- Carefully considering the food they provide to their child as packed lunches and snacks, and trying to limit the number of allergens included.
- Following the school's guidance on food brought in to be shared.
- Updating the school on any changes to their child's condition.

3.5 Students with Allergies

These students are responsible for:

- Being aware of their allergens and the risks they pose.
- Understanding how and when to use their adrenaline auto-injector.
- If age-appropriate, carrying their adrenaline auto-injector on their person and only using it for its intended purpose.

3.6 Students without Allergies

These students are responsible for:

- Being aware of allergens and the risk they pose to their peers.
- Older students might also be expected to support their peers and staff in the case of an emergency.

4. Assessing risk

The school will conduct a risk assessment for any student at risk of anaphylaxis taking part in:

- Lessons such as food technology.
- Science experiments involving foods.
- Crafts using food packaging.
- Off-site events and school trips.
- Any other activities involving animals or food, such as animal handling experiences or baking.

A risk assessment for any student at risk of an allergic reaction will also be carried out where a visitor requires a guide dog.

5. Managing risk

5.1 Hygiene procedures

Students are reminded to wash their hands before and after eating.

Sanitising wipes are available, on request, for a severely allergic student.

5.2 Catering

The school is committed to providing safe food options to meet the dietary needs of students with allergies.

- Catering staff receive appropriate training and are able to identify students with allergies
- School menus are available, on request, for parents/carers to view.
- Where changes are made to school menus, we will make sure these continue to meet any special dietary needs of students
- Food allergen information relating to the 'top 14' allergens is displayed on the packaging of all food products, allowing students and staff to make safer choices. Allergen information labelling will follow all legal requirements that apply to naming the food and listing ingredients, as outlined by the Food Standards Agency (FSA)
- Catering staff follow hygiene and allergy procedures when preparing food to avoid cross-contamination

5.3 Food restrictions

We acknowledge that it is impractical to enforce an allergen-free school. However, posters around school will make students and staff aware of certain high-risk foods to reduce the chances of someone experiencing a reaction. These foods include:

- Packaged nuts
- Cereal, granola or chocolate bars containing nuts
- Peanut butter or chocolate spreads containing nuts
- Peanut-based sauces, such as satay
- Sesame seeds and foods containing sesame seeds

5.4 Insect bites/stings

The following will help to reduce the risk of insect bites & stings:

- Manage waste disposal

When outdoors:

- Shoes should always be worn
- Food and drink should be covered, where possible.
- Students at risk of an allergic reaction will be allowed to wear long PE trousers.

5.5 Animals

All students will always wash hands after interacting with animals to avoid putting students with allergies at risk through later contact

Students with animal allergies will not interact with animals

5.6 Support for mental health

Students with allergies will have additional support through:

- Pastoral care.
- First Aid trained staff in the School Office
- Regular check-ins with their Achievement Tutor.

5.7 Events and school trips

For events, including ones that take place outside of the school, and school trips, no students with allergies will be excluded from taking part

The school will plan accordingly for all events and school trips, and arrange for the staff members involved to be aware of students' allergies and to have received adequate training

Appropriate measures will be taken in line with the schools AAI protocols for off-site events and school trips (see section 7.5).

6. Procedures for handling an allergic reaction

6.1 Register of students with AAIs

The school maintains a register of students who have been prescribed AAIs or where a doctor has provided a written plan recommending AAIs to be used in the event of anaphylaxis. The register includes:

- Known allergens and risk factors for anaphylaxis
- Whether a student has been prescribed AAI(s) (and if so, what type and dose)
- Where a student has been prescribed an AAI, whether parental consent has been given for use of the spare AAI, which may be different to the personal AAI prescribed for the student
- A photograph of each student to allow a visual check to be made.

The information is kept and can be checked quickly by any member of staff as part of initiating an emergency response

All students to keep their AAIs with them will reduce delays and allows for confirmation of consent without the need to check the register.

6.2 Allergic reaction procedures

As part of the whole-school awareness approach to allergies, all staff are trained in the school's allergic reaction procedure, and to recognise the signs of anaphylaxis and respond appropriately.

Staff are trained in the administration of AAIs to minimise delays in students receiving adrenaline in an emergency.

If a student has an allergic reaction, the staff member will initiate the school's emergency response plan, following the student's allergy action plan.If an AAI needs to be administered, a member of staff will use the student's own AAI, or if it is not available, a school one (the school one may be different to the personal AAI prescribed for the student)

If the student has no allergy action plan, staff will follow NHS advice on treatment of anaphylaxis and Anaphylaxis UK's advice on what to do in an emergency on responding to allergy.

A school AAI device will be used instead of the student's own AAI device if:

- Medical authorisation and written parental consent have been provided, or
- The student's own prescribed AAI(s) are not immediately available (for example, because they are broken, out-of-date, have misfired or been wrongly administered).

If a student needs to be taken to hospital, staff will stay with the student until the parent/carer arrives, or accompany the student to hospital by ambulance.

If the allergic reaction is mild (e.g. skin rash, itching or sneezing), the student will be monitored and the parents/carers informed.

7. Adrenaline auto-injectors (AAIs)

The school follows the Department of Health and Social Care's Guidance on using emergency adrenaline auto-injectors in schools.

7.1 Purchasing of spare AAIs

The First Aid Officer is responsible for buying AAIs and ensuring they are stored according to the guidance.

Spare AAIs will be purchased from Malcolm's Pharmacy, 28 Flixton Road, Urmston, M41 5AA

Spare AAIs will be stored in the main office on the medication shelf.

Threef 300mcg epipens will be kept in stock; any replacements will be Epipen.

The dose will be administered as per the guidance on the medication packaging. Further information on dosage can be found on Resuscitation Council UK's age-based criteria, see page 11 of the guidance)

7.2 Storage (of both spare and prescribed AAIs)

The First Aid Officer will make sure all AAIs are:

Stored at room temperature (in line with manufacturer's guidelines), protected from direct sunlight and extremes of temperature

Kept in a safe and suitably central location to which all staff have access at all times, but is out of the reach and sight of children

- **Not** locked away, but accessible and available for use at all times
- **Not** located more than 5 minutes away from where they may be needed. Spare AAIs will be kept separate from any student's own prescribed AAI, and clearly labelled to avoid confusion.

7.3 Maintenance (of spare AAIs)

First Aid Officers are responsible for checking monthly that:

- The AAIs are present and in date, this is recorded on a physical log.
- Replacement AAIs are obtained when the expiry date is near

7.4 Disposal

AAIs can only be used once. Once an AAI has been used, it will be disposed of in line with the manufacturer's instructions.

7.5 Use of AAIs off school premises

Students at risk of anaphylaxis who are able to administer their own AAIs should carry their own AAI with them on school trips and off-site events.

Any students at risk of anaphylaxis will be contacted before a trip to request confirmation that they will be carrying their own AAI. A template is included in the Arbor trip pack which draws parent/carer attention to this.

A spare AAI will be kept in the minibus first aid check, this will be included in the checks carried out by the First Aid Officer.

Any trips which include a student at risk of anaphylaxis will be provided with a spare AAI

7.6 Emergency anaphylaxis kit

- Spare AAIs.
- Instructions for the use of AAIs.
- Instructions on storage.
- Manufacturer's information.
- A checklist of injectors, identified by batch number and expiry date with monthly checks recorded.
- A note of arrangements for replacing injectors.
- A list of students to whom the AAI can be administered.
- A record of when AAIs have been administered.

8. Training

The school is committed to training all staff in allergy response. This includes:

- How to reduce and prevent the risk of allergic reactions
- How to spot the signs of allergic reactions (including anaphylaxis)
- The importance of acting quickly in the case of anaphylaxis
- Where AAIs are kept on the school site, and how to access them
- How to administer AAIs
- The wellbeing and inclusion implications of allergies

Training online will be carried out annually by the all staff..

9. Links to other policies

This policy links to the following policies and procedures:

- Health and safety policy
- Supporting students with medical conditions policy
- School food policy
- Educational Visits Policy
